

8720 2ND LEVEL ORDERPICKER

WITH ELEVATED OPERATOR PLATFORM

RISING TO THE OCCASION TO OPTIMIZE PRODUCTIVITY

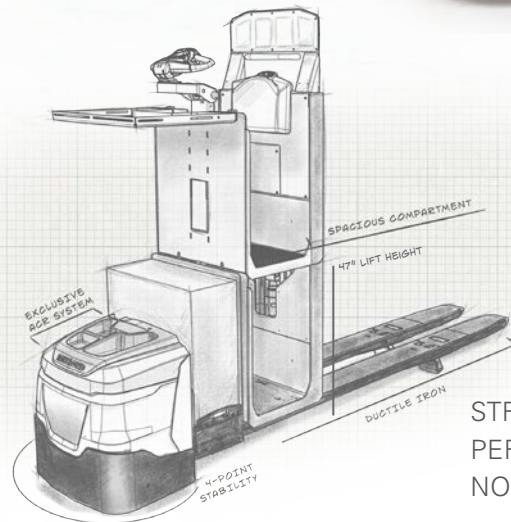

As customers demand ever greater product selection and SKU numbers continue to explode, warehouses are being forced to find additional floor-level slots in order to expand inventory.

The Raymond® 8720 2nd Level Orderpicker lets you optimize slot utilization with an elevated hydraulic operator platform that provides an industry-leading 47" lift height and enlarged pick window for faster, effortless access to second and—in some cases—third load beams.

BENEFITS OF TAKING YOUR ORDER PICKING TO THE NEXT LEVEL

- Access more SKUs
- Keep your same operational footprint
- Improve picking accuracy
- Minimize restocking requirements
- Enhance productivity
- Increase profitability
- Improve cube utilization

STRENGTH AND PERFORMANCE LIKE NO OTHER

INDUSTRY-LEADING SPECS

+ EXCLUSIVE DESIGN

Unrivaled durability, specifically designed for the demands of the North American market with a heavy-duty undercarriage, ductile iron components, and Lift and Go™.

+ LARGER COMPARTMENT 21"

+ HEAVIER CAPACITIES 6,000 or 8,000 lbs.

+ GREATER LIFT HEIGHT 47"

+ MORE FORK OPTIONS

Single (48"), Double (96"), Triple (144")

The Raymond 8720 is the only 2nd level orderpicker to offer an 8,000 lb. capacity with a triple fork.

RAYMOND

A FIRST-RATE SOLUTION FOR 2ND LEVEL ORDER PICKING

Enhance throughput and efficiency with the most productive and durable trucks available.

PERFORMANCE—END TO END

- + Minimize time between picks with simultaneous travel while lifting and lowering, and optional travel at height capabilities.
- + Longer battery life, precise speed control, and less downtime with Raymond's exclusive AC motor technology (ACR System™).
- + Faster, easier, more secure load handling with hands-free platform lowering. *(Optional)*
- + Handy pick rake helps operator access product from the back of pallets. *(Optional)*

STRONGER—TOP TO BOTTOM

- + Ideal for the rigors of North American markets with the industry's most rugged and durable design
- + Long-lasting, reliable performance with heavy-duty components—including ductile iron undercarriage, stainless steel undercarriage pins, steel-reinforced bumper, and composite bushings—that allow capacities up to 8,000 lbs.
- + Fewer service requirements with Lift and Go programmability that trains operators to travel with elevated forks to prevent undercarriage contact and wear.
- + Superior uptime in extreme environments with IP65 protection and optional cold storage conditioning.

OPTIONS

Talk to us about customizing the perfect truck to your needs and facility using our broad array of options.

FASTER, SIMPLER, MORE ACCURATE BATCH PICKING

Exclusive Pick2Pallet™ LED Light System reduces picking errors for enhanced profitability and customer satisfaction. LED lights under the A, B or C pallet position are illuminated to guide correct product placement. *(Optional)*

EASY INTEGRATION INTO YOUR FLEET AND WAREHOUSE MANAGEMENT SYSTEM

iWAREHOUSE®-ready, the 8720 lets you leverage the power of the industry's most complete and scalable telematics platform.

8410 END RIDER PALLET TRUCK WITH 2ND LEVEL PICK STEPS

For operations requiring fewer trips to the 2nd level, Raymond offers the flexible, affordable 8410 with 2nd level pick steps, featuring:

- + The versatility to go from dock work to horizontal transport to low level order picking with a single truck
- + Three pyramid steps accessible from either side of the truck
- + Picking heights to 44" with forks elevated
